OBJECTIVE

Motivated B.Tech student in Computer Science and Business Systems seeking opportunities to apply technical and business knowledge, enhance problem-solving skills, and grow as a collaborative, innovative professional.

EDUCATION

SASTRA University, Thanjavur, Tamil Nadu

Bachelor of Technology in Computer Science and Business Systems, Minor in Supply Chain and Project Management

Expected September 2027 | CGPA: 9.2/10.0 (Current) | SGPA: 9.7 (highest)

Schooling: 600/600 | Intermediate (10+2): 985/1000

SKILLS

Languages: C, C++, Java, Python, R, SQL, PL/SQL

Core Concepts: OOPS, Software Engineering, Operating Systems, Computer Networks

Web Development: MERN Stack, Git

Tools: Python (Computational Statistics), R (Operational Research)

Technology: Ubuntu, VS Code, Modelio, Windows XP, IBM Rational Software (UML)

Languages Known: Telugu, English, Hindi, Urdu

INTERNSHIPS

AI/ML Intern, KRITI Program – Indian Institute of Technology Kharagpur — Jun 2026 – Jul 2026

- Developed an end-to-end machine learning system for seismic waveform analysis using Python, ObsPy, TensorFlow, and XGBoost to automate earthquake detection and multi-class seismic event classification.

MERN Stack Development Intern – WSA — Dec 2025

- Built a full-stack music playlist management system using the MERN stack, implementing REST APIs, CRUD operations, and a responsive UI with integrated database connectivity.

Java Development Intern – UCANLY x Wipro — Apr 2026

- Developed Java applications using object-oriented programming principles, strengthening problem-solving skills through hands-on implementation of core Java concepts and software development practices.

Web Development Intern – Vault of Codes — May 2025 – Jul 2025

AI/ML Intern – Rakch.ai — Ongoing

PROJECTS

Bank Loan Management System — Feb 2025

- Developed the front-end of a Bank Loan Management System using HTML, CSS, and JavaScript, React while contributing to SRS documentation, UML design, requirement analysis, and system usability improvements.

Algorithmic IT Asset Cascading Protocol — Mar 2026

- Developed CASCADE, a software-driven framework for hardware health assessment, asset lifecycle extension, and carbon impact analysis to reduce e-waste and promote sustainable computing.

AI/ML-Based Data Science Job Market Analysis — Sep 2024

- Developed a Python-based data science job market analysis project to identify salary trends, in-demand skills, regional variations, and industry skill gaps.

SEMESTER RESEARCH PROJECTS

- VUCA World:** Researched geopolitical, cyber, and biosecurity challenges in a VUCA world and analyzed adaptive response strategies.
- Aroviya Care – Telemedicine Kiosk:** Designed a telemedicine kiosk concept to improve healthcare accessibility through remote consultations and basic diagnostics.
- PureSenz – Food Adulteration Detection:** Developed a food adulteration detection concept using MNDT technology for rapid, user-friendly purity verification.

RELEVANT COURSEWORK

Computer Science: Object-Oriented Programming, Computer Networks, Operating Systems, Software Engineering, Computer Organization and Architecture, Artificial Intelligence and Logical Reasoning, Compiler Design, Formal Languages and Automata Theory (FLAT)

Database Systems: Database Management Systems, SQL, PL/SQL

Mathematics and Statistics: Discrete Mathematics, Probability, Statistical Modelling, Computational Statistics, Linear Algebra

Management: Financial and Cost Accounting, Fundamentals of Economics, Fundamentals of Management for Engineers, Business Strategy, Design Thinking, Introduction to Innovation, Entrepreneurship and IP Management

Analytical Methods: Operations Research

CLUBS AND ACTIVITIES

- Active member of SALVO AI Club, NSS, Telugu Sahithi Samithi, and Quality Management Club; served on the Hosts and Hospitality Team for Daksh, SASTRA University's annual techno-management fest.
- Created and published a college e-magazine — conducted interviews, wrote content, and captured photography for engaging coverage.
- Runner-up, Daksh AI'25 Hackathon — developed an AI-powered autonomous farm robot for sustainable pest control.
